INNOCEIL

# INNOCEIL

InnoCeil offers the Architect & Designers the flexibility to create any architectural features, curves, waves and shadows effects while incorporating basic building services such as lighting, ventilation, sprinklers and air vents.

Our systems not only create instant sophistication as an architectural feature, but they also have a high acoustic performance rating for the ultimate sound quality and external noise reduction capabilities.

### SIMPLICITY

InnoCeil systems are quick and easy to install. Our systems can be delivered with complete framing, suspended components and trims.

### CAPABILITY

InnoCeil systems can incorporate a unique acoustic material designed to enhance sound absorption and reduce sound transmission, making it the ideal ceiling solution.

### DESIGN INTENT

InnoCeil systems are designed to eliminate the unsightly appearance of exposed screws, nails, holes or surface fixings resulting in a clean and smooth finish.

### BENEFITS

InnoCeil systems are self-extinguishing and deliver excellent fire resistance. All our products have been fully tested under the Early Fire Hazard Test AS15030.3.

## SUSPENDED CLICK ON

Our Suspended Click-On Fixing Ceiling System works on the principle of clipping the InnoCeil profile onto its suspended carrier to secure it in the desired position. This system is available in different sizes to suit most design requirements. The lightweight suspended Click-On system is perfect for areas where structural loads are critical. Our Click-on system makes it easy to install and replace battens.

## CONCEALED CLIP

Our Concealed Clip Fixing Ceiling System utilises a stainless steel clip attached to each profile and screwed into the ceiling substrate without exposed fixings. The system is easy to install and delivers consistent shadow lines between the boards for a smart uniform look.

## SHIPLAP CEILING

Based on a traditional tongue and groove design, our Shiplap Ceiling System creates a clean finish with uniform joints without any visible fixings.
